

Ryan Garrigan

Project Delivery Manager

p. 0419 554 944 e. info@shawcontracting.com.au

Professional Profile

Civil Project Manager / Engineer with 20 years construction industry experience. 3 years Project Delivery Manager, 13 years Civil Project Manager and 4 years Civil Project Engineer.

Ryan has managed complex multi-disciplined civil construction projects of varied size and value within the civil construction, mining and major services sector, often managing multiple projects at any one time. He has worked both domestically and internationally and understand the operational requirements.

I have an excellent understanding of:

- Federally funded major road works including bridges and large culvert structures.
- Bulk earthworks.
- Large structural concrete works.
- Underground services, including large DICL, MSCL & Poly Pipelines.
- Mining operations and the construction of mine infrastructure.
- Industrial and domestic building works.
- Estimating.
- Design and Construct projects.
- Integrated Management Systems; AS/NZS ISO 9001, AS/NZS ISO 14001, AS/ NZS 4801 and FSC (Federal Safety Certification)

I have managed a range of Projects from the tender stage through to project completion with a focus on:

- Managing the OH&S, Environmental and Quality requirements of the project with a focus on zero harm.
- Managing project performance against financial objectives.
- Evaluating project performance and implement adjustments when required.
- Managing client and stakeholder relationships.
- Ensuring projected deadlines and cost objectives are met.
- Providing strong leadership and support to the team and monitor the team's performance against KPIs and project objectives.

Skills and Strengths

- The ability to maintain a clear path of communication with the client / stake holders, management and contractors.
- Monitor project budget requirements and implement cost saving options where possible.

- Contract negotiations.
- Maintaining and coordinating the development and implementation of contract management plans (Occupational Health & Safety, Environmental and Quality).
- Generating and monitoring the construction program.
- Generating Inspection and Test Plans, Job Safety and Environmental Analysis, Risk Assessments and Method Statements.
- Managing and coordinating site specific works and project requirements with contractors.
- Generating monthly progress / milestone claims including variations.
- Assessing and processing subcontractor claims including variations.
- Monitoring and completing all site Safety, Environmental and Quality documentation as per the Project Management Plans.
- Undertaking Site Meetings and generating Monthly Project Reports.
- Estimating.
- Proficient in Microsoft Project, Excel, Word and Auto CAD.Key Skills
